

CLIMATE AND WEATHER

Key Vocabulary

biome	An area defined by its climate, plant and animal life. E.g. desert, forest, tundra and aquatic environments.
climate	the weather conditions prevailing in an area in general or over a long period.
	Conditions in the atmosphere on a particular day.
drought	a prolonged period of abnormally low rainfall, leading to a shortage of water
	An area with very little rain and extreme heat.
tundra	Land where the soil is froze all year. Trees cannot survive the low temperatures.

Climate Zones
