

Key Vocabulary	Measure and Compare Mass	
mass	<p>Scales can be used to measure grams.</p> <p>A gram is a unit of measurement that is used to measure the mass of something.</p> <p>Grams can be written as <b>g</b>.</p>	<p>Scales can be used to measure kilograms.</p> <p>A kilogram is a unit of measurement that is greater than a gram. It is also used to measure the mass of something.</p> <p>Kilograms can be written as <b>kg</b>.</p>
gram		
kilogram		
capacity		
volume		
	<p><math>1000g = 1kg</math></p>	<p>To compare mass, we can use the words 'heavier' and 'lighter'.</p>

Measure and Compare Capacity				
millilitre	<p><b>Capacity</b> is the amount of liquid a container can hold.</p> <p><b>Volume</b> is how much liquid is in the container.</p> <p>Measuring cylinders can be used to measure smaller volumes.</p> <p>Smaller volumes are measured in millilitres.</p> <p>Millilitres can be written as <b>ml</b>.</p>	<p>Measuring jugs can be used to measure larger volumes.</p> <p>Greater volumes are measured in litres.</p> <p>Litres can be written as <b>l</b>.</p>		
litre				
lighter				
heavier				
			<p><math>1000ml = 1l</math></p>	<p>To compare capacities, we can use the word 'full'.</p>

Reading Scales	Knowledge Organiser	
Mass	Capacity	
<p>Each of the melons has a mass of 6kg but the arrows are all pointing at different points on the scales. This is because each of the measuring scales have different increments marked on them.</p> <p>Always look carefully at how the numbers on the scales increase when reading a measurement.</p>	<p>Measuring containers all have different capacities.</p> <p>Each of these containers contain the same volume of 100 millilitres but have different capacities and scales. Always look carefully at how the numbers on the scales increase when reading a measurement.</p>	
Add and Subtract Mass	Add and Subtract Capacities	
<p><math>600g + 500g = 1100g = \mathbf{1kg\ 100g}</math></p> <p><math>1kg - 300g = 1000g - 300g = \mathbf{700g}</math></p>	<p><math>800ml + 400ml = 1200ml = \mathbf{1l\ 200ml}</math></p> <p><math>1l\ 300ml - 200ml = \mathbf{1l\ 100ml}</math></p>
